

# SASSI to Go

**Step 1** - From an Internet-connected location, the counselor downloads “SASSI to Go” to their laptop or even to a USB thumb drive.

**Step 2** - The counselor meets with his/her client in a location that has no Internet access.

**Note:** *The counselor can still use SASSI to Go to administer any of the same instruments that we offer on SASSI Online. The counselor can also store several clients simultaneously, and upload them all later in a single batch.*

**Step 3** - The counselor returns to a location with Internet access and uploads the batch to SASSI Online. The individual screenings are scored, reports are generated, and the counselor’s SASSI Online account is debited at the time of the upload.
